## CARNATION AND GIANT FLOWERED

**Gigantea Sunset Giants** is a Novelty from California; it is said to have the largest known flowers in the "Marigold" group, averaging 5 inches and some flowers attaining a size of 7½ inches across. Instead of the usual "Marigold" odor these flowers have a definitely sweet fragrance. This is a mixture ranging from deep orange through golden orange, deep golden yellow, light yellow, lemon yellow, and a delightful new shade of primrose. The strain comes from 60 to 65 per cent double.

Tr. Pkt. .... 20c ¼ oz. .... 55c Oz. .... \$1.75

**Gigantea Orange Sunset.** The color is a deep, rich, lively orange, one of the most admired shades found in the Sunset Giants Mixture. The plants are strong growing, upright branching in habit, usually about 3 feet tall, producing a heavy growth of foliage, and with 6 to 8 heavy branches, each bearing 3 to 6 large flowers. Blooming commences about the first of August in most sections of the country, in late June in the southern states, and flowers can be depended on well before frost in any latitude. Orange Sunset has been tested and found to be a fine forcing in the greenhouse, and will come over 65 per cent double.

**Burpee Gold Improved.** Odorless foliage. Here is truly a Marigold with a host of things to commend it—even, rich, deep orange color, large flowers, 3½ inches across, beautiful Carnation-like form, attractive habit, uniformity of color and blooming time, full doubleness with no singles, earliness, and above all absolute freedom from the usual Marigold odor.

## TALL AFRICAN ALL-DOUBLE

Seed should be sown under glass. Set the plants 12 inches apart in the bench and support the same as Carnations. May also be grown in 6-inch pots sunk in the bench if desired.

The color range is excellent, and if the blooms are kept cut as they mature the flowering period will continue from December well on into the spring.

# A.F.S. "Easi-Off" WOOD PLANT BANDS

Removed  
without  
cutting

## Grow All Your Plants, Seeds, and Cuttings This Modern Way

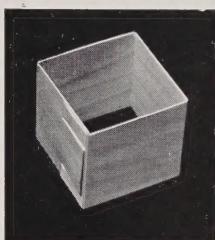

Easily  
assembled

This modern method of culture saves time and labor, and assures the highest yield in cut flowers, potted plants, perennials, nursery stock, etc. Saves losses at transplanting time by avoiding a check to root systems. **Buy now for immediate use and for stock on hand.**

## "Easi-Off" PLANT BANDS Are Removed Without Cutting. The Dirt Ball and Roots Are Not Disturbed.

SIX SIZES  
For All Types  
of Growing

"Easi-Off" PLANT BANDS hold nearly three times as much soil as the equivalent sizes in clay pots, allowing a longer growing time without bound roots.

### NOTE THESE EIGHT IMPORTANT ADVANTAGES

1. Saves at least one shifting operation in growing potted plants.
2. Non-porous; holds moisture longer, in the bench or in the ground.
3. In cut flowers, the current crop can be kept in production in the benches as long as desired, while plants for the next crop are developing, healthy and strong, in "EASI-OFF" PLANT BANDS . . . Ideal for Snaps, Stocks, Carnations, Tomatoes and all greenhouse crops.
4. Clean and safe, protecting against fungus.
5. Suitable sizes for evergreens, field roses and other lining-out stock.
6. Ideal for carrying perennials over into fall or spring.
7. Durable but light; can be shipped without removing the plants, thus retaining moisture for outside feeder roots.
8. "EASI-OFF" saves a great deal of time in removing the plants; no cutting—just pull apart the slotted edges.
